

## GTECH GTSIMF01 Fixed Wireless Business System

### Overview

The GTSIMF01(Micro Unit) is a revolution in Small Business Telephone Systems. This next generation in desktop wireless phones integrates landline phone features and functions, with those of a mobile phone. The Micro Unit allows you the best of both worlds, you can make outgoing calls using the mobile (GSM Network), while allowing you the option of using the landline (PSTN) and/or mobile (GSM Network) for incoming calls. The addition of cordless handsets makes this a true Small Business System.

### Benefits

- Save on call costs
  - Turn Fixed to Mobile calls into Mobile to Mobile calls, thereby in most cases reducing call costs
- Save on Provisioning and Installation costs
  - No need to provision Fixed Lines
  - Easy installation, no cabling required
- Save on Re-Location/Expansion costs
  - Re-Locating? just pick up and take your phone to your new location
  - Add additional business numbers without having to provision new lines
- Already advertised a fixed line number for your business?
  - The Micro Unit allows you to keep your advertised fixed line number, with the added benefits of cheaper outbound mobile (GSM) rates.
