

Teleconferencing can save 54,000 tonnes of CO² emissions.
That equates to driving 151 million miles.*

Polycom Audio Conferencing Guide

covering units suitable for:

Large Meeting Room	Desktop
Medium Meeting Room	On the Move
Small Meeting Room	Home Office

Bridging the gap between time and distance.

As businesses become more extended, the people working within them become less-connected and potentially less productive. Enabling individuals to communicate effectively across geographies, time-zones, devices, technology platforms and mediums represents a significant challenge for IT.

Conferencing enables people to communicate and collaborate easily and intuitively through advanced voice and data conferencing solutions – refreshing clarity of the natural spoken word, effortlessly projecting undistorted conversations.

From desktop to auditorium systems, Polycom has the right voice solution to meet your needs exactly.

Polycom® is the worldwide market leader in conferencing solutions.

STEP 1

Choose your conferencing unit

Over the page is a quick reference guide designed to help you select the conferencing solution best suited to your needs. **Further information for each solution can be found on pages 4 to 10.**

STEP 2

Compliment your conferencing unit with our new product ranges

Choose from our latest Polycom CX product family for Microsoft Office Communicator Server 2007 or our Wireless Communications KIRK range. **From page 11.**

The units within this guide are labelled according to suitability:

Voice Conferencing			
LARGE MEETING ROOM	Up to 20 people	DESKTOP	2/3 people
MEDIUM MEETING ROOM	Up to 10 people	ON THE MOVE	1:1 people
SMALL MEETING ROOM	2/3 people	HOME OFFICE	2/3 people

Choose the conference phone to best meet your needs:

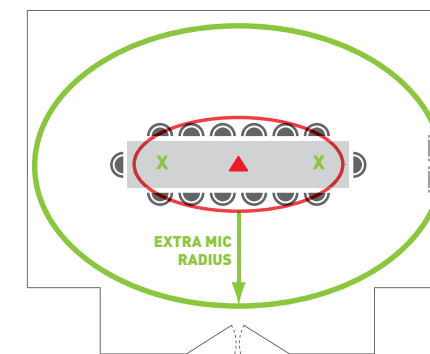

1. Determine connectivity requirements
2. Choose level of quality and functionality desired
3. Match the product to the correct room size/no. of people

Unit Microphone Coverage

- VoiceStation 300 and VoiceStation 500 (typically max. 4 people/4ft)
- SoundStation2, SoundStation2W, SoundStation IP 4000 and SoundStation 2 for Avaya/Nortel (typically max. 8 people/2m mic radius)
- SoundStation VTX 1000 (typically max. 12 people/4m mic radius)

Expandable Microphone Coverage

- SoundStation2 EX with EX with Mics, SoundStation2W EX with Mic, SoundStation IP 4000 with Mics and SoundStation2 for Avaya/Nortel with Mics (typically max. 12 people/4m mic radius)
- SoundStation VTX 1000 with Mics (typically max. 20 people+/7.5m mic radius)

¹ Please see www.polycom.com for a list of SIP Technology Partners that have certified the SoundStation IP 4000 product.
² Not all mobile phone models support the SoundStation2 and SoundStation2W mobile phone connector. Conferences using some mobile phone models may experience diminished audio quality or other functionality. For a list of mobile phones that are known to work well, please consult www.polycom.com.
³ Not available on VoiceStation 300.

Learn more about our Polycom® conferencing solutions

The following section includes the full range of conferencing solutions according to meeting size.

SoundStation VTX 1000®

Suitable for > **LARGE MEETING ROOM**

Key Features

- Noise cancellers
- Filters background noise
- Inbuilt microphones - 3
- Easy to use
- High fidelity sound
- Coverage - up to 6m
- Acoustic Clarity Technology
- Echo cancellation
- Remote speakers
- Built-in investment protection - add new features and applications through an ordinary telephone line

The SoundStation VTX 1000 is truly a leap in voice conferencing technology. It automatically adapts to each meeting environment and can cope with up to 20 participants simultaneously, providing high fidelity voice clarity for all involved.

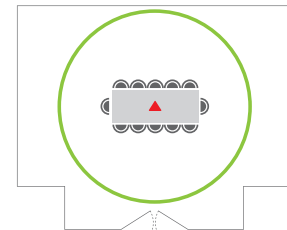

Users can speak at a normal conversation level and be heard clearly from up to six metres away, maintaining the integrity of speech even in large rooms through sophisticated voice processing systems that cancel out echo and reduce noise.

And, when the SoundStation VTX 1000 detects a connection with another HD voice enabled VTX 1000 device, it automatically activates the VTX™ high definition mode, resulting in extraordinary fidelity.

SoundStation2W™

Suitable for > **MEDIUM MEETING ROOM** **ON THE MOVE**

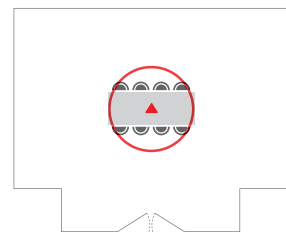

Key Features

- Superior voice quality
- Easy to use and install
- Integrated keypad
- Mute button
- Flash key
- Standard analogue telephone jack
- Full 360 degree coverage
- Inbuilt mics - 3
- Digital speakers
- 2.4GHz wireless technology
- Talk time - 12 hours
- Full duplex operation (2-way)
- Mobile phone connectivity
- LCD display
- Echo cancellation
- Increased mic pick up
- Software upgradeable through mini-USB port

The SoundStation2W gives you the freedom to conference anywhere. With superior voice quality, proven wireless technologies, added security of voice encryption and the ability to dial through a mobile phone or computer, the SoundStation2W delivers voice quality that has double the volume and microphone sensitivity as the SoundStation, enabling clearer, natural two-way conversations. Our secure 1.9 GHz DECT platform provides simple and robust wireless capability with any analogue phone line.

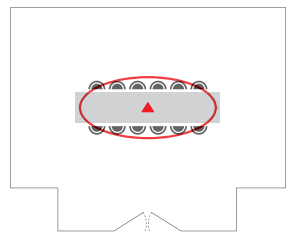

With a 45 metre roaming capability, wireless frequency to avoid interference and a long lasting Lithium-ion battery, the SoundStation2W delivers excellent voice processing and flexibility.

VoiceStation® 300

Suitable for > **SMALL MEETING ROOM** **HOME OFFICE**

Key Features

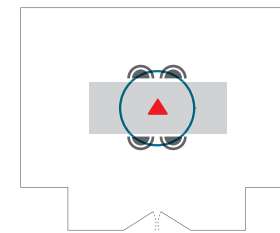

- Acoustic Clarity Technology
- Room coverage - 360-degree for 2 metres
- Hands free operation
- Easy to install
- Connects to any analogue phone jack
- Dynamic Noise Reduction for max mic sensitivity
- Telephone pad - 19 keys
- Microphone range - 2 metres

The VoiceStation 300 conference phone is ideally suited for desktops, home offices, and other small rooms. With 360-degree microphones coverage for a two metre range, the VoiceStation 300 is ideal for limited size conferences involving two to three participants. It's compact and sculptured design fits well on a desk or small table, making it an ideal solution for affordable audio conferencing.

Acoustic Clarity Technology delivers improved voice quality over the previous-generation VoiceStation 100 whilst three microphones offer 360-degree room coverage.

Unit Microphone Coverage

Typically max. 4 people/2m

Stock Code	Description	SRP (ex VAT)
PLY/VS300	VoiceStation 300	£226.00

VoiceStation® 500 Analogue Conference Phone with Bluetooth

Suitable for > **SMALL MEETING ROOM** **HOME OFFICE**

Key Features

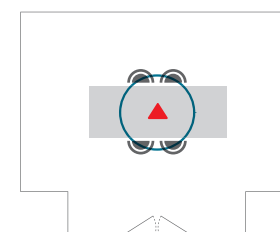

- Acoustic Clarity Technology
- 360-degree room coverage from up to 2 metres away
- Hands free operation
- Microphone range - 2 metres
- Easy to install
- Telephone pad - 19 keys
- Dynamic Noise Reduction for max mic sensitivity
- Bluetooth connectivity
- Secondary phone options
- Mobile and Internet connection - 2.5mm applications port

The VoiceStation 500 is a Bluetooth® enabled conference phone ideally suited to small conferences involving three to four participants. With its compact, sculptured design the VS500 provides a neat, affordable solution for the office.

Interface with the VS500 using Bluetooth or the hardwired connection port through a mobile phone or computer for hands free voice conferencing via conventional routes or Skype™. Three microphones offer 360-degree room coverage.

STEP 2

Compliment your conferencing unit with our new product ranges

Polycom® CX Product Family for Microsoft Office Communications Server (OCS) 2007

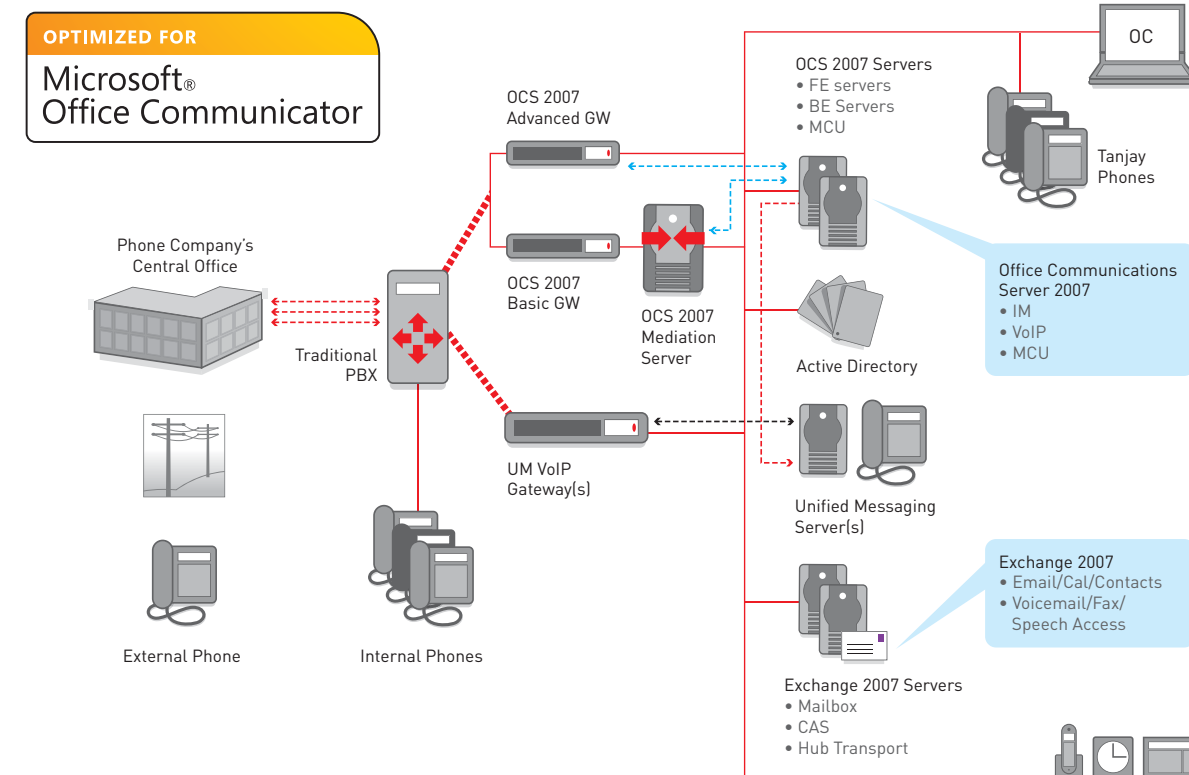

The Polycom CX product family of IP handsets have been specifically commissioned by Microsoft to work with their OCS 2007 Unified Communications suite. This enables collaboration between disparate communications - email, instant messaging, voice, video, mobile and conferencing - under one 'presence' based environment where the best medium is automatically chosen.

OCS 2007 breaks down the barriers that separate phone-based and computer-based work. Tested, secure and reliable, this exciting advancement is quite literally plug and play. Familiar and easy-to-use Microsoft software minimises training needs, making implementation incredibly straightforward.

OCS improves workflow, which subsequently improves efficiency and productivity. Because it connects the right people, through the right medium on the first attempt, using the most effective communication mode available, it streamlines the communications process significantly.

Unifying communications will fundamentally change the way people work in the coming decade, transforming business in the process.

The Polycom CX range is distributed through Rocom in the UK and includes three high definition, wideband voice over IP (VoIP) handsets that deliver a high quality voice experience.

Polycom CX100 Speakerphone

Suitable for > **DESKTOP** **MOBILE WORKERS**

The CX100 Speakerphone enables hands free conversations from a Microsoft Office Communicator 2007-enabled computer. With wideband audio quality, two microphones for small group conversations and a portable solution for CD-quality audio, the CX100 delivers seamless voice and video communications. Users can plug into the built-in stereo headphone port for private conversations. It connects and powers through an integrated USB cable for easy installation. The integrated button controls allow users to pick up or hang up calls, adjust speaker volume and mute during a call without the use of a mouse.

Key Features

- Hands free
- High fidelity wideband voice quality
- Microphones with 360-degree pickup - 2
- Easy to use
- Built in stereo headphone port
- Acoustic Clarity Technology
- Portable solution for CD-quality music and presentation audio
- Wideband audio provides excellent range for small group conversations
- Seamless voice and video communications
- Connects and powers through integrated USB cable
- LED indicators display incoming, muted active and voicemail calls
- Integration with audio capabilities on Microsoft Office Communicator 2007
- Integration with audio capabilities Microsoft Office Communication Server 2007

Ships with integrated USB cable, user guide, neoprene carry case. Audio performance may vary based on PC specifications.

Stock Code	Description	SRP (ex VAT)
PLY/CX100/COMMUNICATOR	Communicator CX100	£64.00

Polycom CX200 Desktop Phone

Suitable for > **ENTERPRISES** **HOT DESKING**

The CX200 desktop phone combines high definition and high fidelity audio for crystal clear conversations. Its plug-and-play USB audio peripheral is tightly integrated with Office Communicator 2007, full duplex, hands free speakerphone, keys for volume control, mute speakerphone mode and use of an external headset. LED indicators displays call forwarding status and message waiting indication and a large LED conveys user presence status. It connects and powers through an integrated USB cable for easy installation and use, so there are no extra cables to carry.

Key Features

- Integrates with and complements Microsoft Office Communicator Server 2007
- Compatible with Microsoft Windows XP or Microsoft Windows Vista
- Hands free
- Easy to use and install
- High-quality, high definition wideband audio
- Enhanced presence indicator
- Intuitive to use
- Plug-and-play operation to a USB port on the PC

Ships with: CX200 desktop phone base, handset, 6ft. handset curly cord, captive USB cable, quick start guide and warranty card.

Stock Code	Description	SRP (ex VAT)
PLY/CX200	CX200 Desktop Phone	£69.00

Polycom CX700 IP Phone

Suitable for > **ENTERPRISES** **EXECUTIVE DESKTOP USE**

The CX700 IP phone delivers remarkable high definition audio quality. With its sleek, high-quality handset and its full duplex, hands free speakerphone, it features a fully embedded Microsoft Office Communicator 2007 client. It provides direct, on-device access to the features and capabilities of Office Communications Server 2007, all using a touch-screen colour display.

Delivering enhanced presence status information and voicemail indication via an intelligent Microsoft Windows CE based user interface, it enables users to easily control their calls - click-to-call, conferencing, transferring, holding, forwarding and ending calls. A familiar keypad and navigation wheel allow users to make calls the traditional way, while supporting enhanced navigation to pick up / hang up calls, control volume, switch to speakerphone or headset mode and mute the microphones on the active call.

Key Features

- Standalone IP phone for use with Office Communications Server 2007
- Biometric fingerprint reader or on-screen keyboard to personalise preferences
- Manage calls through Microsoft Windows CE-based touch-screen interface
- Click-to-call from contact list or call log
- Enhanced incoming call information
- On-screen presence status indicators
- Access voicemail
- Use as wireless
- Type via on-screen keyboard
- Connect PC to the on-board Ethernet port
- View calendar on screen
- Backlit LCD display - 5.7"
- Touch wheel with centre select button
- USB 1.1/USB2.0 compatible
- LED off hook, voice messaging, call forwarding and multicolour presence indicator

Ships with: CX700 base, handset, 6ft. handset curly cord

Stock Code	Description	SRP (ex VAT)
PLY/CX700	CX700 IP phone	£298.00

Polycom Wireless Communications

Small and medium businesses need to get the most out of every investment, employee and technology decision they make.

The Polycom KIRK range is designed and manufactured for specific vertical markets such as retail, healthcare, hospitality, office and manufacturing. They enable businesses to improve workplace productivity by delivering affordable wireless telephony solutions that are simple to install, highly reliable and operate in the most demanding physical environment.

Polycom® KIRK DECT Systems

Polycom® KIRK Wireless Server 500

The KIRK Wireless Server 500 is an add-on wireless solution for businesses with a need to supply up to 8 mobile employees with a wireless handset. With an analogue interface to the PBX, it can be equipped with up to 6 KIRK repeaters, that do not need cabling, and handles up to 6 simultaneous conversations.

KIRK repeaters can be daisy-chained to extend coverage or reach challenging areas.

Key Features

- Integrated server / base station
- Repeater - up to 6
- Automatic log in of KIRK wireless handsets
- Analogue connection to PBX
- Handsets - up to 8
- Wireless users - up to 8
- Caller ID support (Bell 202)
- Analog interfaces
- Modular design for simple installation and scalability
- 1.8 GHz operation
- Digital wireless technology for excellent voice quality and security

Stock Code	Description	SRP (ex VAT)
